How
Where

Who

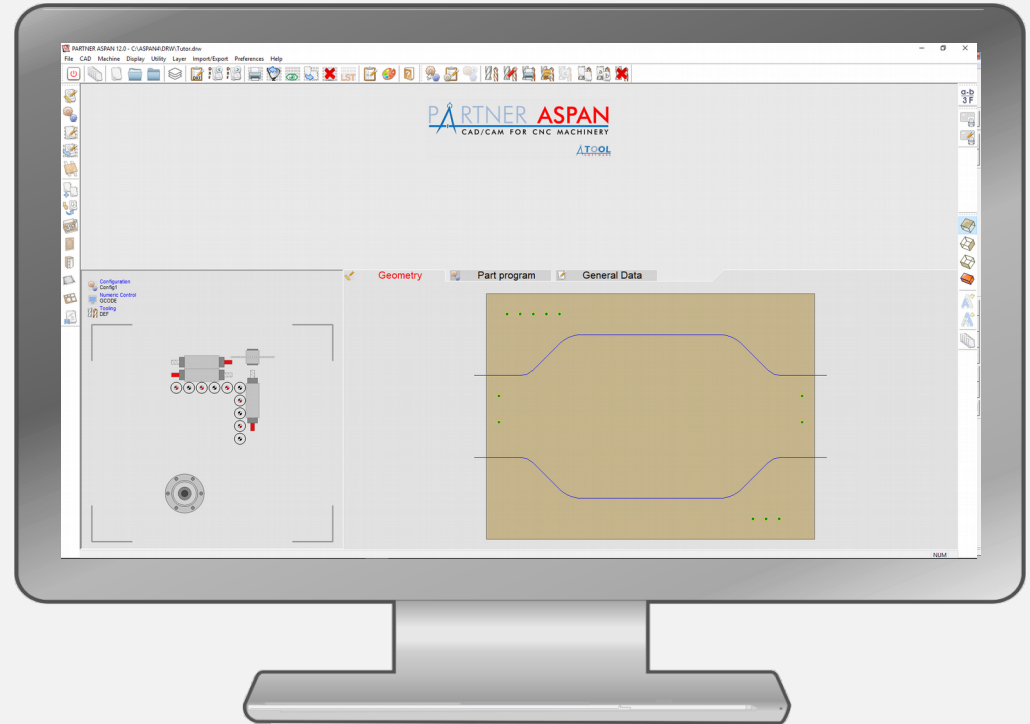

PARTNER/ASPAN
is a software
who's task is to help many
tipologies of users:

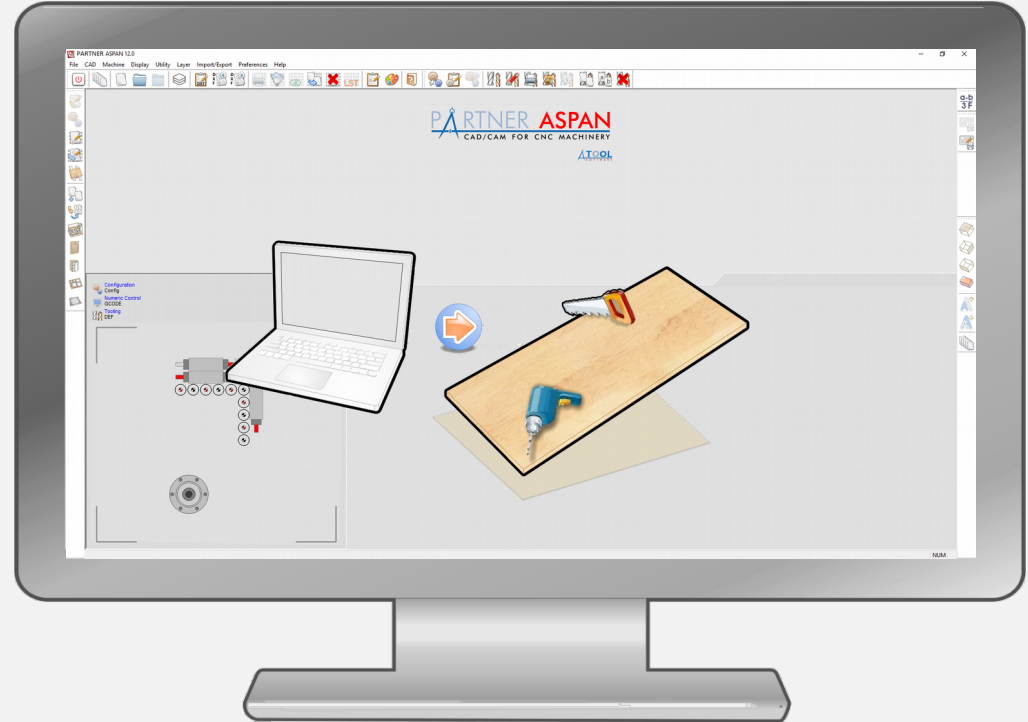

- newbies and experienced users;
- small and big companies;
- machine manufacturers.

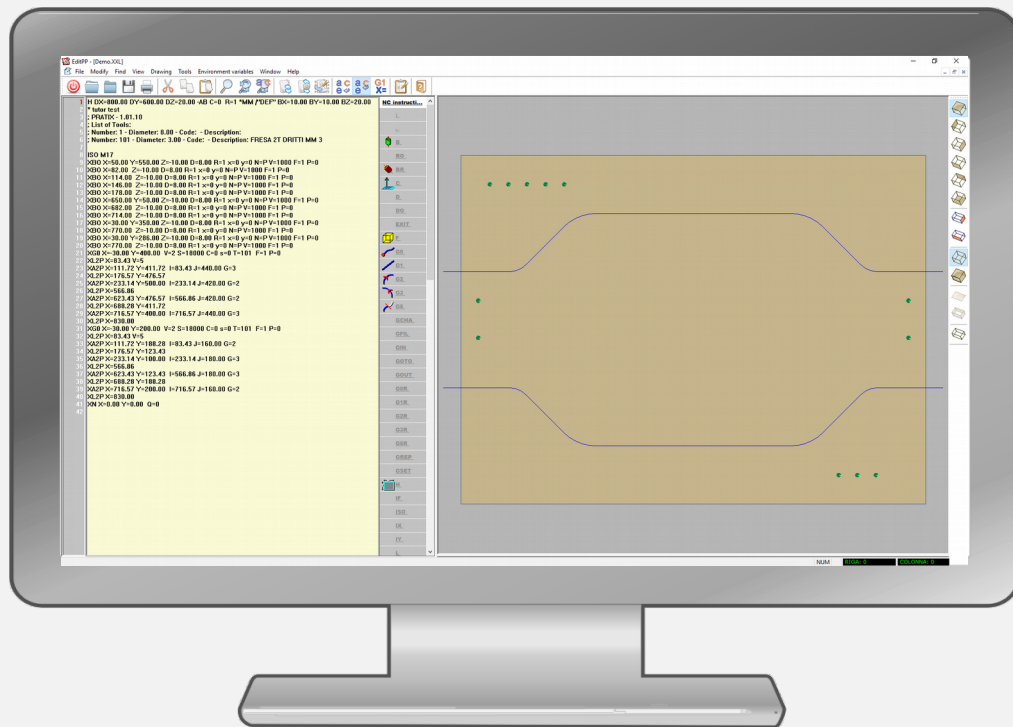

What

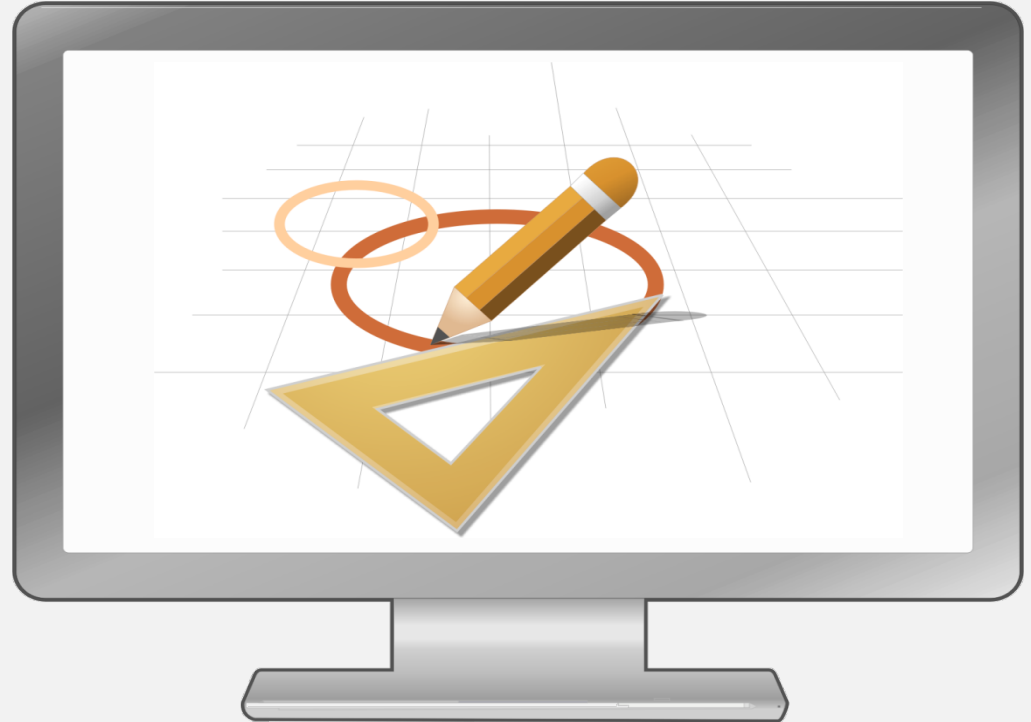

PARTNER/ASPAN
allows you to create a
drawing easily and
quickly (CAD)
and to create
the relative
part-program (CAM)

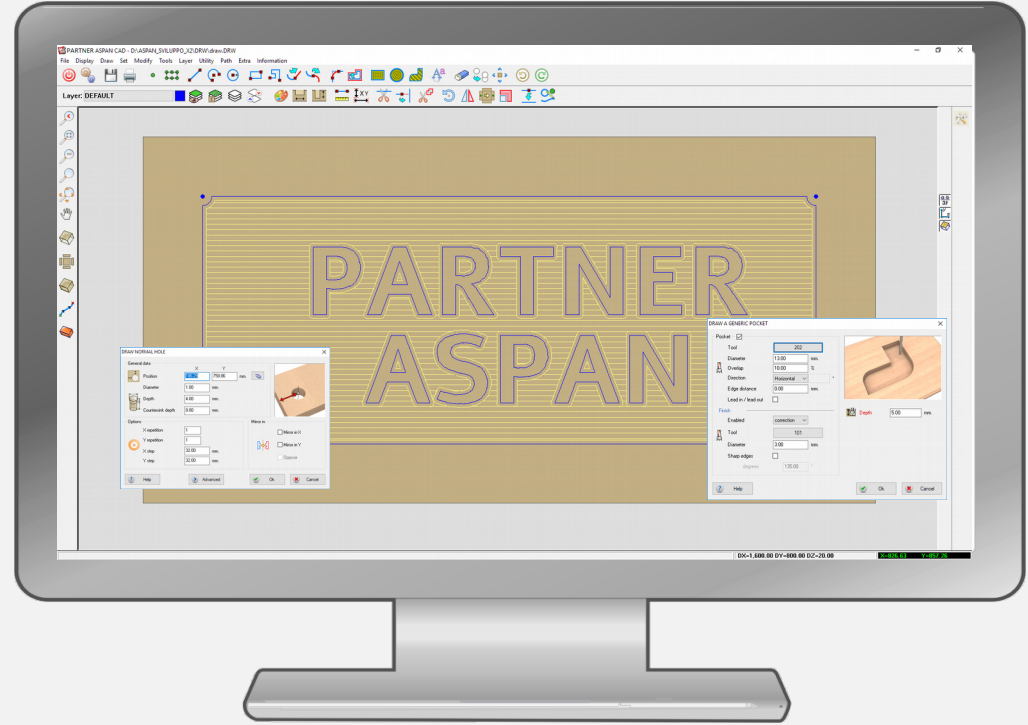

PARTNER/ASPAN is
easy to use and allows
the creation and
management of
part-programs
also for not
experienced users

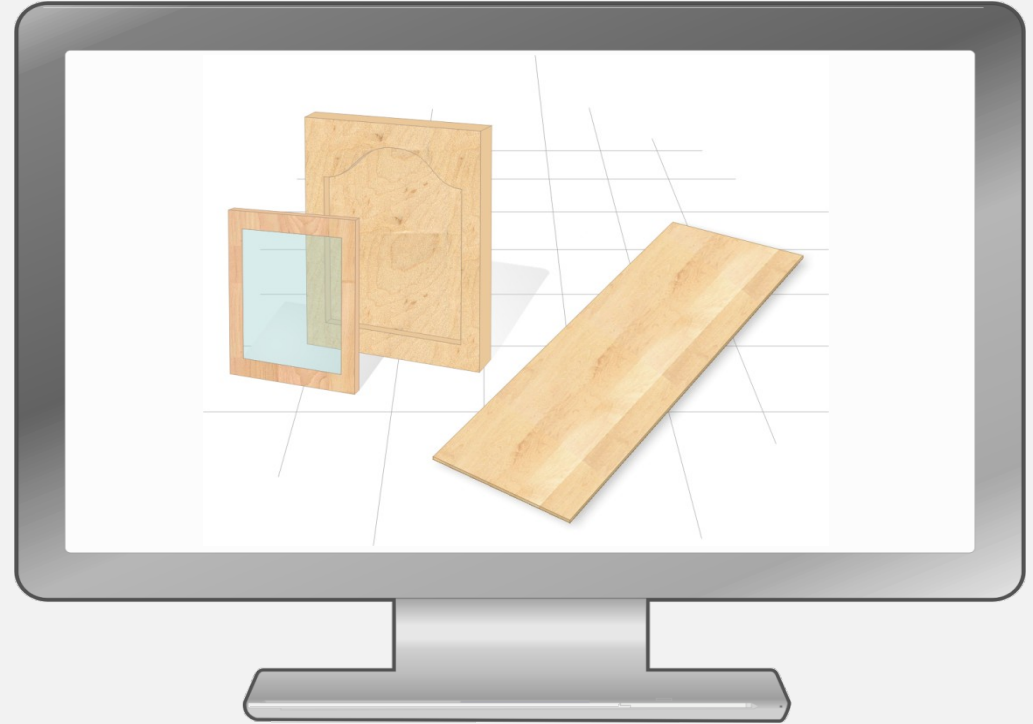

The integrated CAD
environment of
PARTNER/ASPAN
allows you to easily
create your drawings

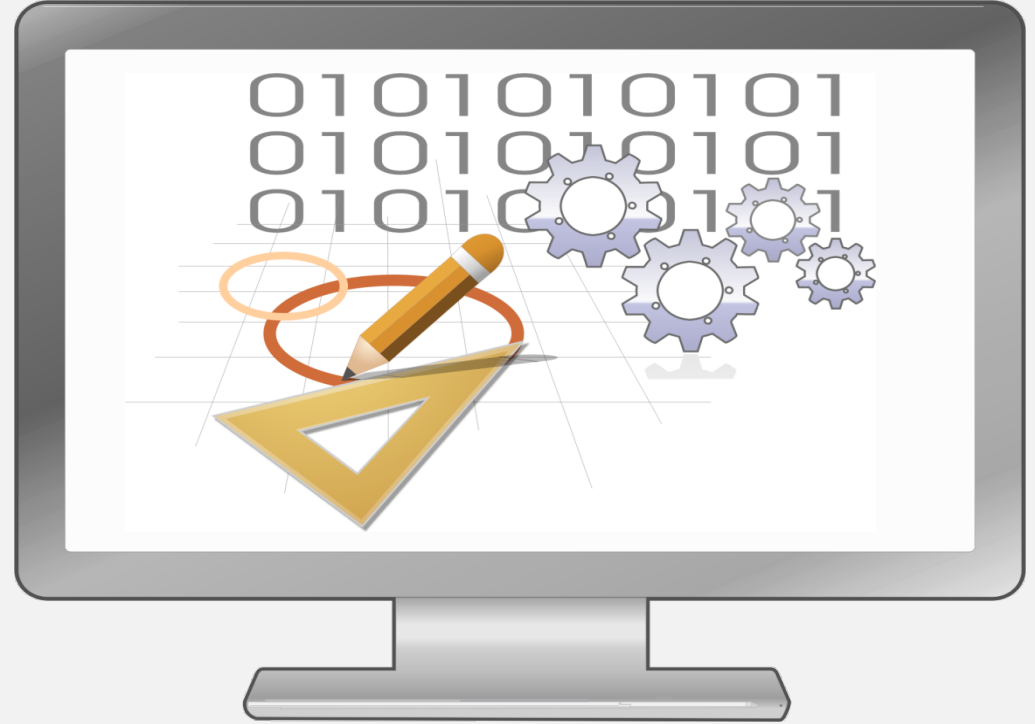

In the CAD environment
you can draw holes,
routings, pockets,
tilted planes
and all that you need to
create your projects.

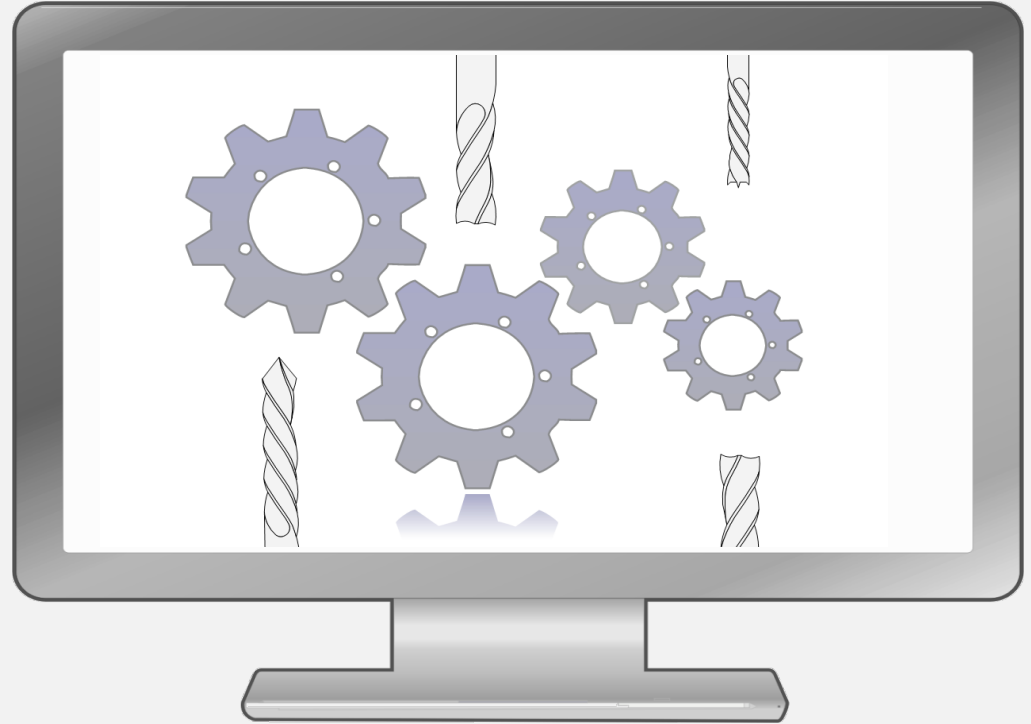

The user will be able to
easily create both
simple pieces
(ex. cabinet side)
and complex machining
(ex. door frame)

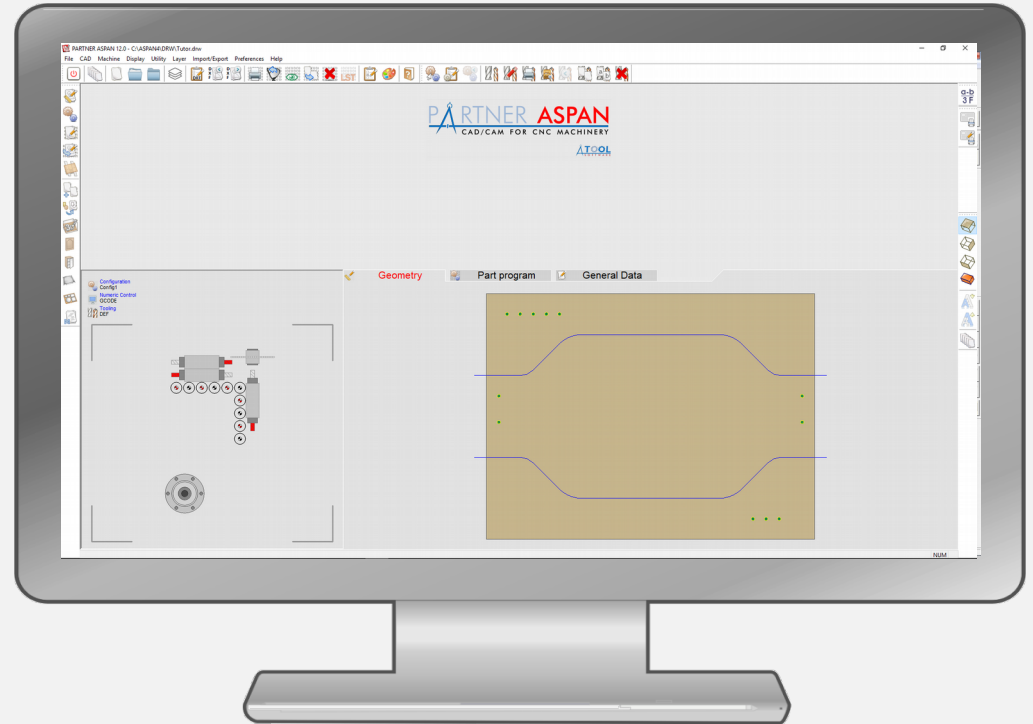

The CAM environment of PARTNER/ASPDAN is where drawings will be converted into part-programs

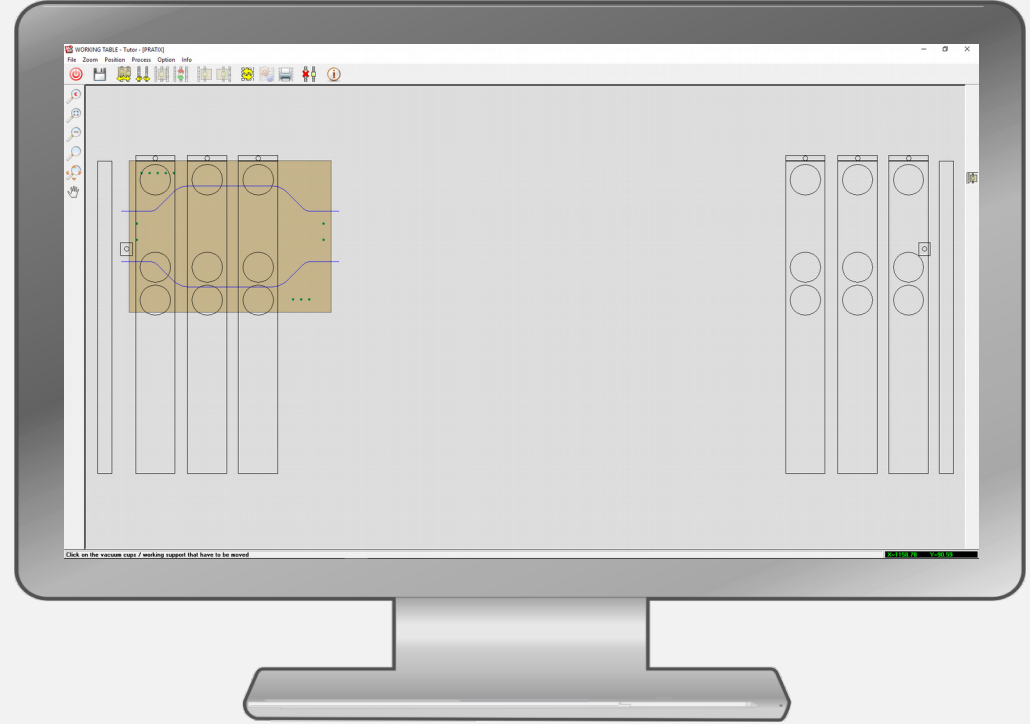

The CAM environment
of PARTNER/ASPAN
can automatically
assign the correct tool
to the machining
and optimize
machining sequence

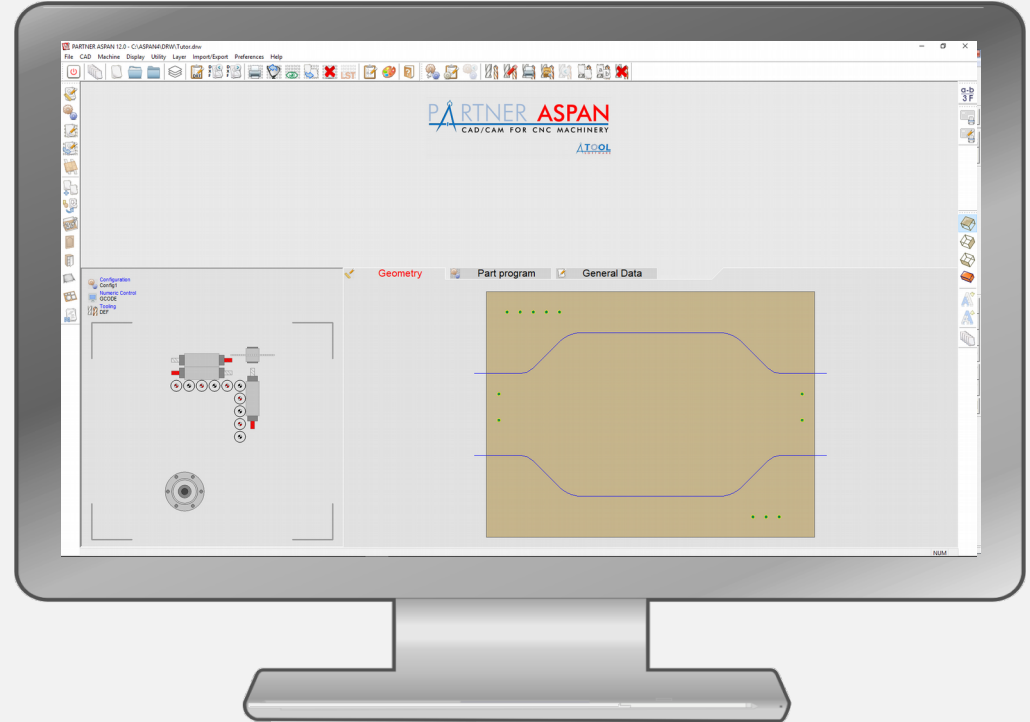

When

PARTNER/ASPAN can be used
also when the user is not
experienced with machine's
part-program
or if he does not want to
prepare his projects on the
machine but he prefers working
seated comfortably in front of
his PC.

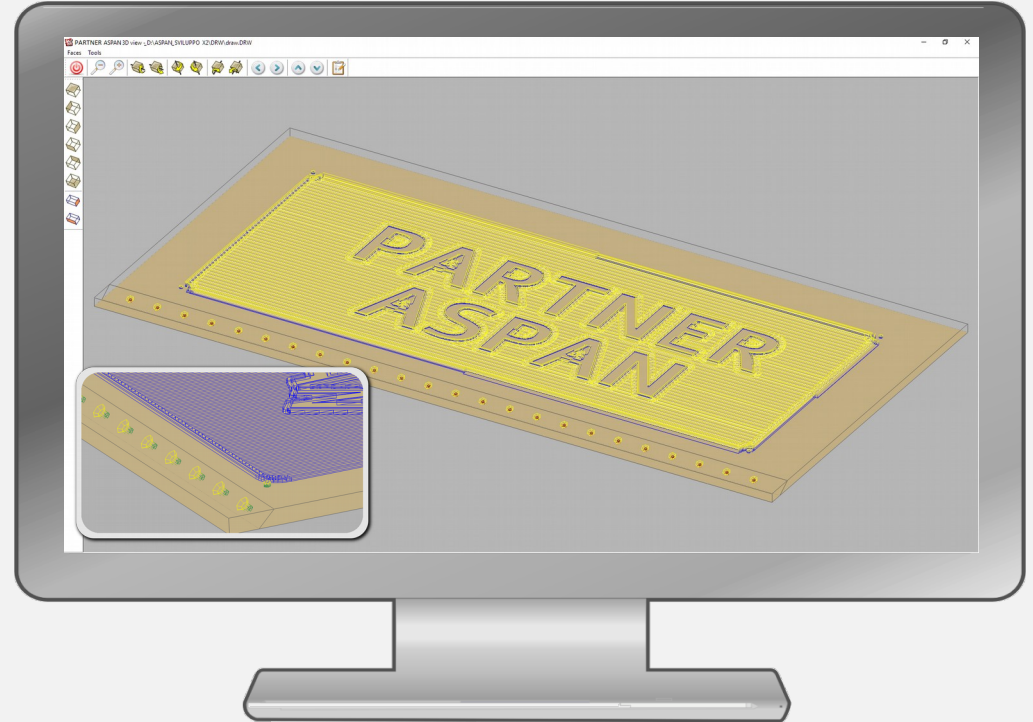

Why

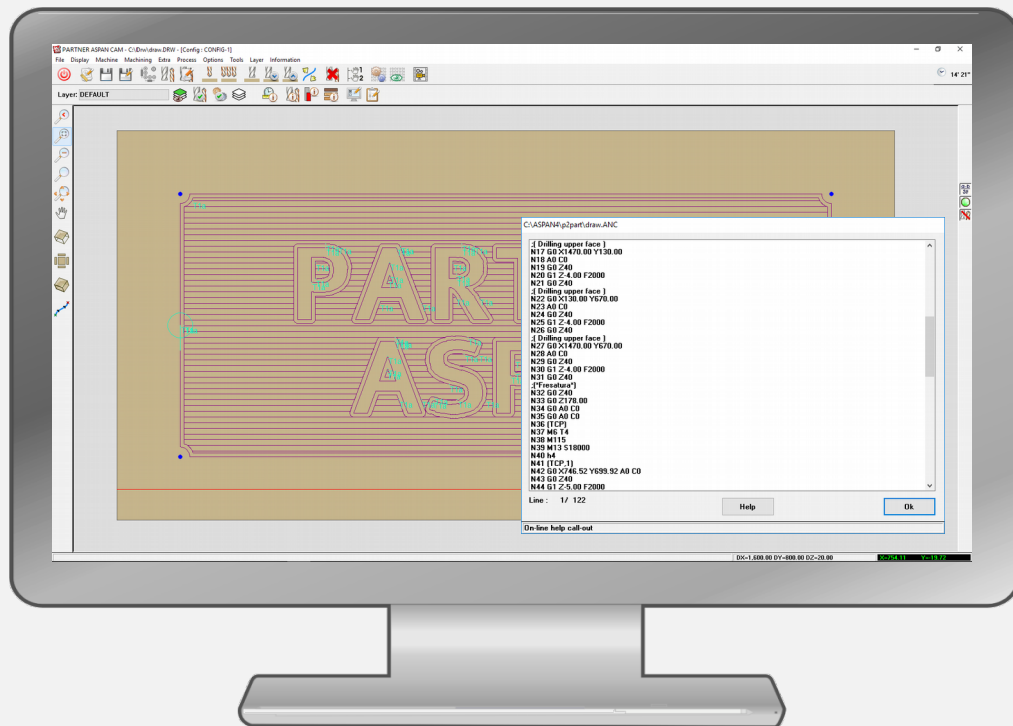

Easy but powerful:

PARTNER/ASPAN is
useful and suitable for
both "basic" and
"advanced" users.

Versatile:

capable of performing
many operations both
in design and creation
of part-programs

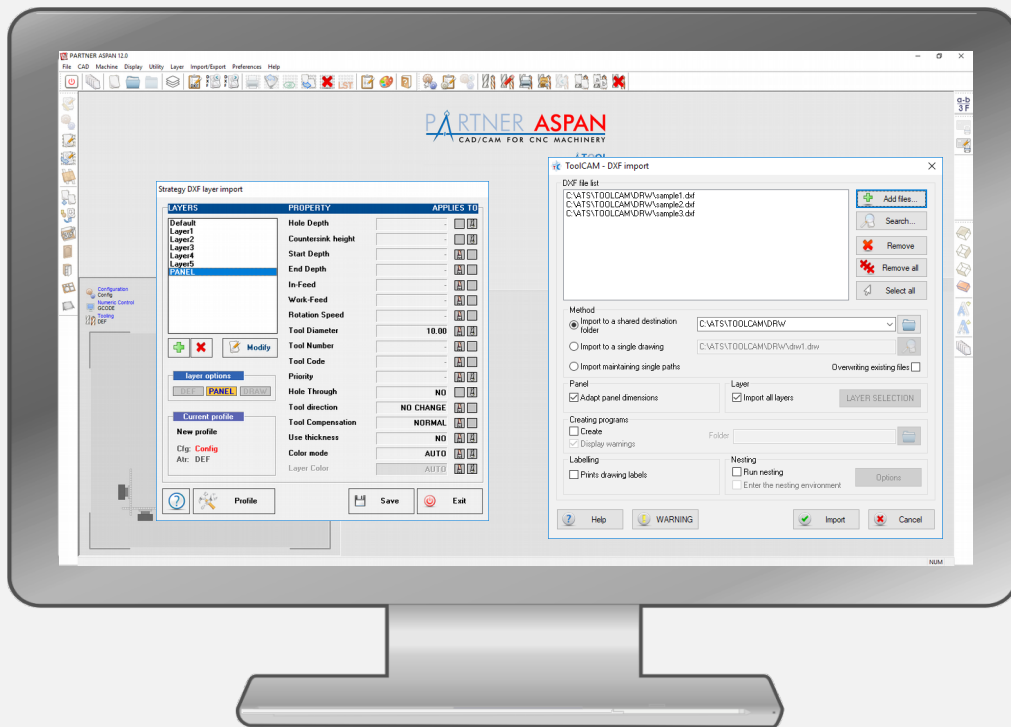

Flexible:

PARTNER/ASPAN
can manage manage
many types of
machines

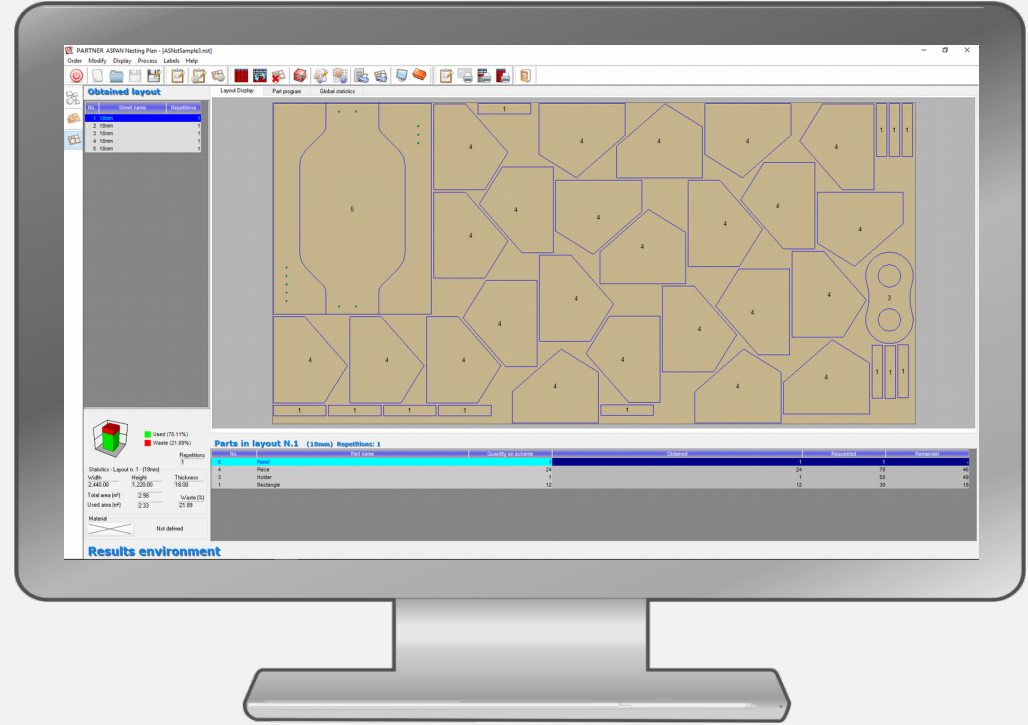

For "small" and "big":

PARTNER/ASPAN
manages projects for small
and large businesses, also
through the
possibility to import external
drawings (not created with
PARTNER/ASPAN) in the
DXF format

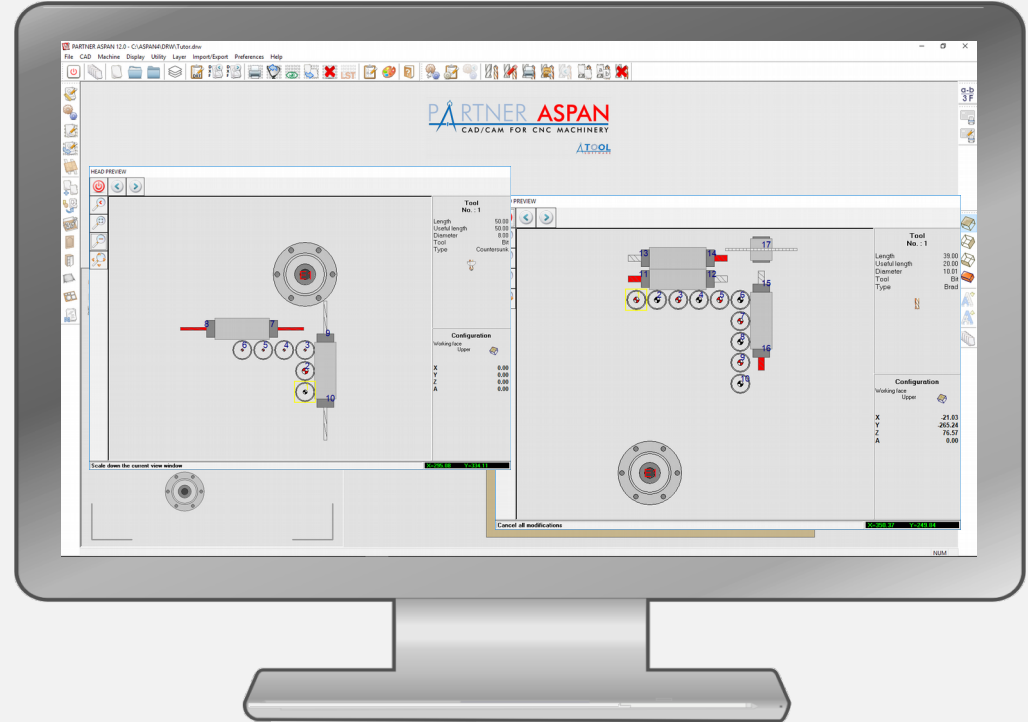

Practical:

with PARTNER/ASPAN
it is possible to
manage all the steps of
an order, starting from
the drawn
of the single pieces till
the final Nesting

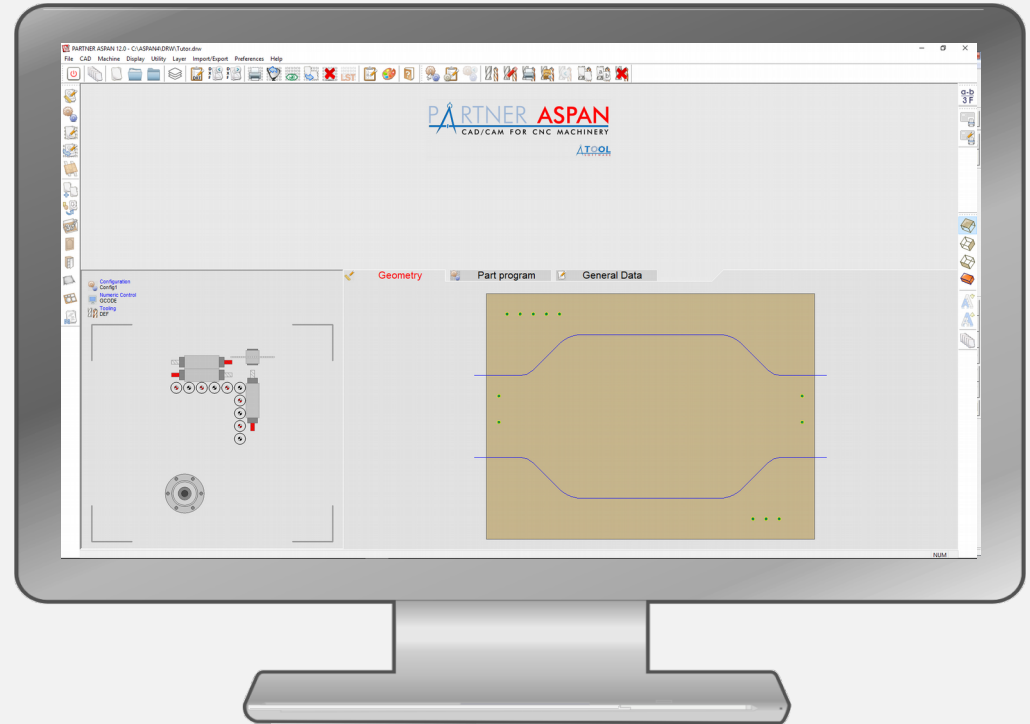

Customizable:

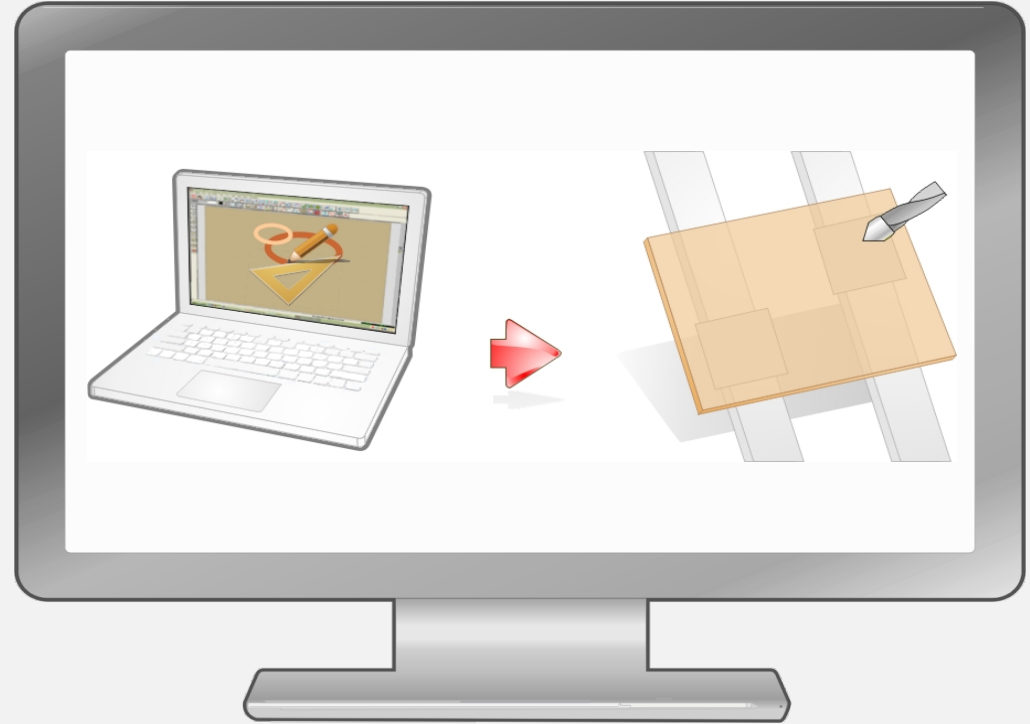

PARTNER/ASPAN can be customized to user needs
(ex. creation of specific commands useful for your needs)
and also to machine manufacturers needs
(ex. make available to the user some particular function specific for their machine)

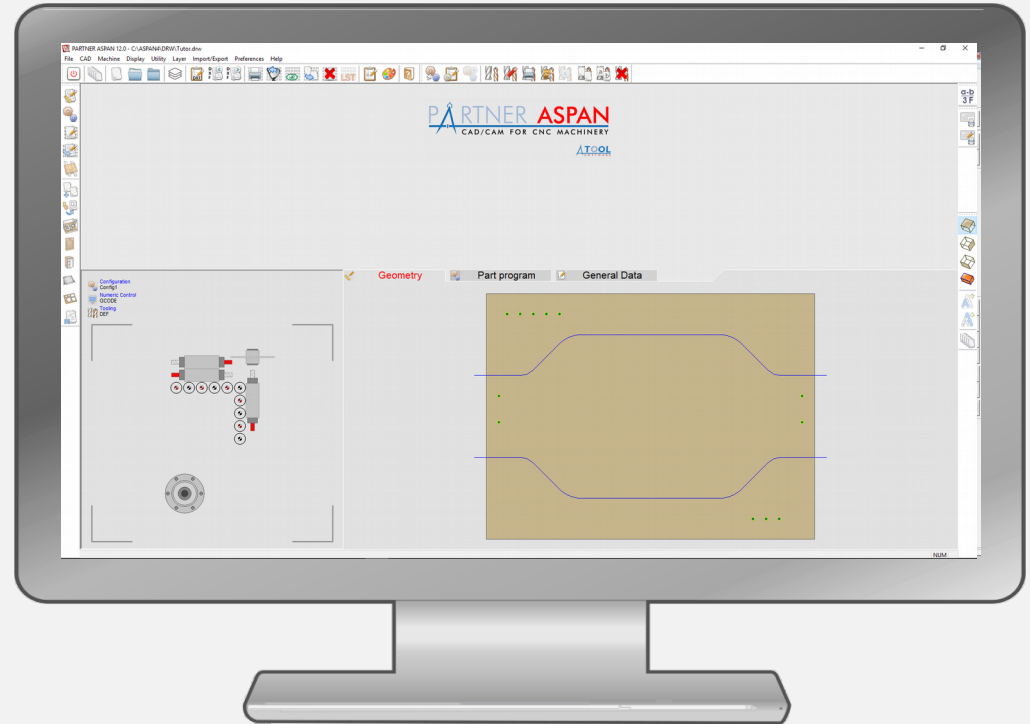

How

PARTNER/ASPAN can be installed on every modern PC, can be used anywhere, without the need for the user to install and use it directly on the machine
